Mehdi Abbas Nathani

Flutter frontend Developer

With an MBA (University is Blue Card pre-approved) and over a decade of professional experience—from finance to data scraping with Google Apps Script and Python, and automating processes with VBA/GAS—I am now transitioning into Frontend Development. I specialize in designing clean, scalable architectures by implementing the MVVM pattern in Stacked, the MVC pattern in GetX, and Next.js for robust web applications. Passionate about creating innovative, user-centric cross-platform mobile applications, I am committed to continuous learning and will be moving into agentic AI learning as I further expand my technical horizons
